

NEUROSTAND

AI TURNAROUND **IMPACT** **CHECKLIST**

 www.neurostand.pt

IS NEUROSTAND THE RIGHT FIT FOR YOUR OPERATION?

This checklist helps identify where NEUROSTAND can make the biggest difference.

.1 Insight & Data

- We have live visibility of each step in the turnaround process
- Pushback times are predicted automatically
- Bottlenecks are flagged before they cause delays
- CCTV footage is integrated into operational workflows
- Turnaround data is centralised in a single platform

.2 Collaboration & Coordination

- Ops, airline and handling teams work from a shared source of truth
- Everyone knows what needs to happen and when
- Live updates are available at the gate, stand and in the control room
- No repeated calls or double checks are needed to stay aligned
- Delays are acted on immediately rather than reviewed later

.3 Tools & Technology

- Tasks are tracked digitally instead of on radios or spreadsheets
- Teams can access turnaround status on mobile devices
- Historical performance is used to improve future turnarounds
- No additional hardware is needed to support live tracking
- AI is already being used to support decision-making

YOUR SCORE

12 TO 15

Ahead of the curve

You've got a solid system, but NEUROSTAND helps you raise the bar even further with predictive pushback times, proactive alerts and a shared operational picture for all teams.

7 TO 11

Strong base, clear opportunity

There's structure, but it's not fully connected yet. NEUROSTAND brings your tools together, adds real-time intelligence, and cuts through daily friction adding to what's already in place.

0 TO 6

High impact expected

You're likely relying on manual steps, siloed tools or reactive processes. NEUROSTAND delivers clarity, automation and predictability, without new hardware or complex integration.
